Our size is one of the not-conscious marxism: the dualistic view of the nortal; of objects which exist independently of our consciousness. (How can we know that may our consciousness?). Conform to this outological mor one all the phenomena we witness: the confamination of natural he mays of huminal substances for health, psychology, pedajacy etc. The via shirtion of this view and all the phenomena should produce children who are more dosed, len open, than earlier jewerations. The opposite is experience from the achildren are more open (conflicts), but this doesn't penetrate to the ratio, thinking. So they live in combacticity uninds, which is norse them pine maixism. Separating the children from nature, natural stuffs, reducing their movement, TV, music sim of the computer james would produce all (in epon very).

D he cognition consciousness and world one one, no duality o let a tacit understanding bé all! let there be a sitent un alestomoling and no more (Huany 74, p 34; 42,) o Buddh said: / July affaired nothing from complete, nulxcelled Enlightenment. The Place of Precious Things: All we can voy is that is close by . It cannot be exactly described, but when you have a tacit understanding of it substance, it is there. H.P. 47 Thus, if only you have a facit understunding of Minde you will not need to scowih for any Thomas, for then Mind is the Thomas. (4. P. 48). Many people are apaid to empty their winds lest they may plunge into the Void. They do not know that their own hind is the Void. The ignorant esden phenomena but not thought, the wire eschen thought but not phenomena (4. P. 48). D'Aussen, innen, oben, unten: Mes Bestimmungen des Bewertreins. Wo ist dann dieses Bewinstein? Ill the concepts you have formed in the past must be discurded and replaced y the void. Where dualism ceases, there is the Void of the Word of thathapatas. The term, would of the this later implies that not the smallest hairs breadth of anything con exist there (4.P.56) O Die Quelle der Worte kann wicht Annih Worte beschrieben werden. your true I nature is something never lost by one even in moment of slepenion novit a garned it the moment of Eulytenment. It is the nature of the Bhutakata In it is neither olelusion nor night midenstanding. It fills the Void every where acid is in trinsically if the substance of the One Mind. Itom, then, can you wind - was led objects exist outside the Void? The Void is purdamentally without spacial alinewision passions, activities, delusions or net understanding. You news dearly understand that in it there are no things, no were and no Guadhas; for this Void confaires not the smallest hairs breadth of anything that can be viewed spacially; it depends on nothing and is a Hacked to withing. It is all-parading, spotters beauty; it is the self-exisfent and unreated Absolute. (HP93)

As soon as the mouth is apened, evils spring forth. People either neglect the root
and speak of broundes, or reflect the reality of the "illusary" ustal and speak out
of Enlightenment. In else king whither of cosmic activities leading to halus frunction
